BUILD FAILED in 54s
Running Gradle task 'assembleDebug'...                    55.9s
Exception: Gradle task assembleDebug failed with exit code 1
```

i tried pub clean, get and upgrade but still nothing

here's my flutter doctor result

```

This unfortunate hint to ask here is unfortunately shown on any failed Gradle build, even if it is not at all a Gradle problem. In your case what you showed says that the task `:app:compileFlutterBuildDebug` is failing, so you probably have some problem in some code you try to compile and not a Gradle problem.

[Skip to main content](#) probably see the actual error.
